

Workshop

Carbon Farming Outreach Program

Carbon Essentials

Wednesday 5 March

With an increasing requirement for carbon emissions reporting in the future we are helping farmers and industry to be ready!

This workshop is designed to help Farmers and Service providers understand the impact of Australia's transition to net zero emissions, what we can do now to be ready, how to reduce emissions to be make informed decisions in the future.

- ✓ Emission Reduction opportunities with informed decisions.
- ✓ Why is carbon a big deal?
- ✓ How to get carbon in your soil
- ✓ What are the biggest levers to reduce emissions – for cropping and livestock
- ✓ How to measure carbon emission – calculators

Presenter

Dr Cassandra Scheffe, Soil Scientist with AgriSci

Time: 8:30am – 12:30pm

Venue: Cadell on the Murray
325 Perricoota Rd, Moama

Cassie is a renowned research scientist in soil chemistry. Cassie specialised in soil chemistry and soil-plant interactions, completing a GRDC-funded PhD with Monash University on the interactions between carbon and fertilisers to improve nutrient availability in acid soils.
